Welcome to Games Workshop's 2009 Citadel Miniatures Catalogue.

This catalogue includes our full range of models for Warhammer, Warhammer 40,000 and The Lord of the Rings. You will also find our complete range of rulebooks, Codexes, army books, and gaming supplements for these games. In addition we have included our paints, brushes, modelling accessories, scenery and gaming aids such as dice, measures, and templates. In short – you will find everything needed to put together and field an army– all clearly illustrated in colour throughout.

We also have two further Citadel Catalogues available on-line to download. The first is the Specialist Games catalogue covering our Blood Bowl, Battlefleet Gothic, The Battle of Five Armies, Warmaster, Epic, Mordheim, Inquisitor, and Necromunda ranges of games and models. The second is our catalogue of Bitz Packs featuring our range of conversion pieces for modellers, plus our recently launched and highly acclaimed Collectors series. Many of the models in the Collectors series can be pressed into service as part of a Warhammer or Warhammer 40,000 army, or a The Lord of the Rings force.

We have tried to make sure this catalogue is as up-to-date as possible at the time of going to press. New models are released every month, so our ranges are constantly growing whilst older models are often retired to make way for updated versions. Check out our web-store www.games-workshop.com for the latest information about forthcoming and newly released miniatures and up-to-the-minute news about offers and events.

About the Models

Models in this catalogue are shown painted. All models are supplied unpainted. All miniatures are shown at ACTUAL SIZE, unless otherwise noted. All models that require a base are supplied with the correct plastic Citadel Miniature slottabase.

The models shown in this catalogue are shown assembled. This is not how they are supplied. All models will require some assembly. Most models require nothing more complicated than affixing the miniature to its plastic base. Some multi-part metal kits are labelled in this catalogue as being recommended for experienced modellers. These kits will need a degree of modelling skill to assemble.

CHAOS SPACE MARINES

"We fight the long war, not through vain notions of duty or honour, but through a far purer purpose: hatred. At the height of our glory we were betrayed and cast out by our own kin. Guilliman, Dorn, Sanguinius these are names I curse. Horus, Perturabo, Angron these names I revere, names I would follow to the very end."

Ferrous Ironclaw, Warsmith of the Iron Warriors Second Grand Company At the birth of the Imperium of Man, fully half of the Emperor's most trusted Space Marine Legions turned against him in a bitter civil war, becoming Chaos Space Marines. Ten thousand years after their defeat, those same traitors still launch their Black Crusades out of the Eye of Terror, intent upon nothing less than the utter destruction of the Imperium and the death of its weakling Emperor.

DARK ELDAR

"Spawned in the darkest pits of the universe, the piratical Eldar are a curse upon all races of the galaxy. For untold thousands of years they have preyed upon us, stealing forth from the shadows and dark places on their raids of terror and violence; massacring or capturing all those whose paths they cross."

High Lord Kouron Imperial Commander of Astherax. These demented cousins of the Eldar are a curse upon ad. For endiess midennia, the Dark Eldar have preyed upon other species, butchering or imprisoning al. Their piratical raids strike without warning, smashing defences quickly and then disappearing before reinforcements arrive. When a raiding force appears on a planet its inhabitants know one thing it is far before to die fighting the Dark Eldar than be taken alive by them.

"What do humans know of our pain? We have sung songs of lament since before your ancestors crawled on their belies from the sea."

The Eldar craftworlds—massive drifting starships that are home to the last survivors of a race that once ruled the galaxy—are scattered across the stars. IMPERIAL GUARD BANEBLADE

The Banchlade is one of the most powerful war machines in the galaxy. In one round of shooting alone it can bring to bear the mighty banchlade cannon, a demolisher cannon, two tascarnons and three twin-kniked heavy boiters. This devastating brepower coupled with its thick armour, makes the Banchlade the gride of the Emperor's armies.

The Baneblade is a massive plastic let with 7 frames and over 250 components. The kif can be assembled in many variations with 3 optional slots for the sponson weapon mounts and all the components needed to make the Helihammer Anti-Infantry Tank

THE INQUISITION

"You must face the truth squarely and without flinching from duty. Our enemies are mortal no longer. Mercy for such as they is a chimera, self-deception is its only ally. Dedicate this weapon, given unto your hand at the behest of the Emperor, to their destruction. Regard its function as your only duty; you live only to bring cleansing fire."

Galbus Heer, Lectures to the

Ordo Malleus.

The Witch Hunters of the Ordo Heret.cus are perhaps the most sinister of all Inquisitors as the threats they must face lurk amongst the everyday citizenry of the Imperium; the witch, the mutant, the heretic and the fallen cieric

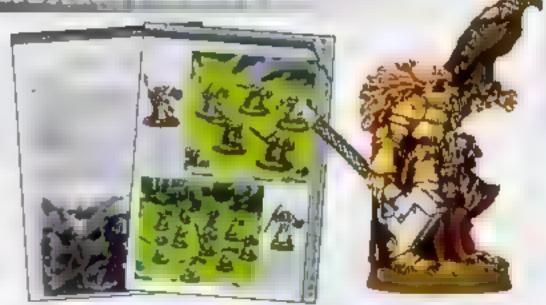

The Inquisitors of the Ordo Ma leas, the Daemonhunters, are at war with forces too terrible to comprehend and, together with the Grey Knights, they take the light of the Emperor into the darkness.

NECRONS

"We are less than cattle to these beings, chattel to be cast aside, consumed or made sport for their pleasure. There is not one among them that would pay heed to a world of man as I would to an ant on my boot."

Inquisitor Kessel at the Conclave of Eidolon

The skeletal warriors of the Necron race have lain dormant in their stasistombs for millions of years. Now, ancient portents are realised and a horror from the darkest depths of pre-history awakes.

ORKS

"The Orks plague the galaxy from end to end with their ceaseless warring and strife. They are a race rooted so deeply in war that peace is utterly incomprehensible to them. They cannot be bargained with or bought save with weapons which they will inevitably turn against those who tried to bribe them. I pray with all my faith that some great catastrophe will annihilate them but I fear that ultimately it is they, not we, who will rule this galaxy."

Orks are the most widespread and warlike race of aliens in the bloodstained galaxy of the 41st Millennium. They only live for one thing and that's war. They are constantly fighting anything that gets in the way, even themselves! In fact the only thing keeping the Orks from uniting and bringing down the end of the galaxy is their inability to get along. Were they to organise and unify, they would quickly overwhelm and crush all opposition

SPACE MARINES

"They shall be pure of heart and strong of body, untainted by doubt and unsullied by self-aggrandisement. They will be bright stars in the firmament of battle. Angels of Death whose shining wings bring swift annihilation to the enemies of Man."

Roboute Guilliman, Primarch of the Ultramarines The Space Mannes of the Adeptus Astartes are humanity's ultimate warriors, dedicated to the defence of the Emperor and the Imperium of Man. They are barely human at all, but superhuman, having been made superior in all respects to a normal man by a harsh regime of genetic modification, psycho-conditioning and regorous training

"A Dwarf army is like a well-crafted mail shirt; each warrior is an iron-hard link, knitted together by duty, honour and loyalty. And, like a mail shirt, never a blow shall pass them as long as all the links remain strong."

The Dwarfs are the most tenacrous and determined warriors of the Warhammer world. Their mountain holds are under constant pressure from Orcs, Goblins and Skaven so they must frequently march out to defend their homes and hoards. Even in defeat they record and remember every affront and will miss no opportunity to settle their grudges with the edge of an axe

LIZARDMEN

"Amid the darkness and horror of a world splintering apart, the armies of the true creators, we who were ancient at the dawn of time, will march forth once more. We shall sweep away all that is chaos and disorder, for ours is the true path, and none shall defy us."

Translation from ancient plaques attributed to Venerable Lord Kroak.

Long before the rise of the Fives,
Dwarfs or Men, the Lizardmen
existed in the oppressive depths of
the steaming jungles. Coldly arien
and enigmatic, their civilisation seeks
to restore the order in the world that
their Old One creators envisaged
before their mysterious
disappearance

COLLECTORS RANGE

The Collectors range is intended to both complement and supplement our main ranges which aim to provide all the essential troops types, characters and machinery required to assemble an army for Warhammer or Warhammer 40,000 or build forces to play our The Lord of The Rings game. In selecting models for the 'Cotlectors' range we have used three main criteria as explained below

Showpiece models are display pieces, often dioramas or set-pieces, primarily intended for painting and display rather than gaming. Although this is a small part of the Collectors range at the moment we hope to add more showpiece models over time

Atternative models are metal alternatives to plastic models in the main range, or alternative character. Variants too numerous and varied to include in the main Catalogue. Some of these models have been drawn from previously discontinued ranges but compare well in quality to modern designs - others are brand new additions to the Collectors range.

Historic models are slices of Citadel's history - they are models that remain popular amongst collectors either because they have special significance as

design landmarks or because they are charming characterful or just plain quirky. Generally speaking, these models do not match the quality of modern designs and they are often significantly smaller

Our policy is to maintain a catalogue of Collectors models of a size that we can reliably manufacture and supply. We can't hope to make all of our entire archives available at once, so instead we will cycle. through our back-catalogues, dropping pieces where demand is low and adding pieces that are commonly asked for or which we think will be popular Although models will always be retained in the range if there is genuine demand - we cannot guarantee that any models will be available year after year and would suggest that serious co lectors make purchases whilst models are available rather than taking a chance

Our Collectors range is growing all the time as we add new models or recommission moulds from our archives. In order to purchase models from the range you can visit our web site or download the most upto-date version of the Collectors Catalogue from www.games-workshop.com

BITZ RANGE

For years Citade; has offered converters and modellers a special parts service enabling customers to purchase component metal pieces for their own modelling projects. On some distant occasion now long-forgotten these individual metal pieces were dubbed 'Bitz' – and Bitz they have stubbornly remained ever since – so that now when we talk about components we invariably say 'Bitz' and trust that everyone understands what we mean!

Our Bitz ofter has evolved over the years and nowadays a range of components is offered in convenient pre-packaged selections as part of the Games Workshop Direct service. Plastic pieces now form an important part of the Bitz collection as Citadel's range of plastic models continues to expand Many pieces previously available only as metal are now offered in plastic. Our aim is to provide as wide a range of metal and plastic Bitz as possible, and our intention is to expand the range this year and to continue to do so for the foreseeable future.

Some of our Bitz are duplicates of individual components of models available in our main ranges, but this is far from being universally the case. Many of our Bitz designs are unique pieces created

specifically for converting – and as such they are not available elsewhere. New designs are often dreamt up by our sculptors or they are based on the suggestions of enthusiastic converters and modellers, ideas for new Bitz packs are always welcome – be they alternative head types for Imperial Guard, weapon and equipment sprites, or decorative pieces of any kind... all suggestions will be keenly considered.

Customers are asked to bear in mind that all of our Bitz are intended for use by competent converters and a fair degree of modelling skill is assumed. Some reworking, cutting and remodelling will be required when fitting pieces together, whitst larger metal pieces may require pinning or supporting for strength. Obviously, there are some pieces that are designed to be compatible with other standard parts, such as our Space Marine shoulder-pad sets, but it is wise to check all pieces before assembly and to always assume that some work will be necessary to achieve a satisfactory fit.

If you want to see the entire range of Bitz please consult our online store www games-workshop.com where you can also download the most up-to-date version of the Catalogue

Specialist Games

If you've collected an army for Warhammer, Warhammer 40,000 or The Lord of The Rings Strategy Battle Game, and you now fancy trying something a bit different within the Games Workshop hobby, then the Specialist Games range is for you.

At present the Specialist Games range includes the following games: Blood Bowl, Warmaster, Epic 40,000, Battlefleet Gothic, Mordherm, Necromunda and The Battle of Five Armies.

Each game has an original background setting based within the worlds and universe of Warhammer, Warhammer 40,000 and the Hobbit. From leading a vicious gang in the dilapidated Underhives of Necromunda, marshalling tens of thousands of troops over the great battlefields of the Old World, commanding two-mile long cathedral battleships, coaching an all-star sports team, or going undercover deep in the last of a Chaos cuft - the possibilities are endiess.

Each game in the Specialist Games range has also been designed to highlight a certain facet of the hobby - you may want to collect and paint miniatures that are in a different scale, or wish to develop a gang or team in a league or campaign environment; you may wish to role-play or tell stories through your games; or play games whose rules provide different factical and strategic challenges; or you may just want to push spaceships about on the table top!

You can order the miniatures from www.games-workshop.com, where you will find the most up-to-date version of the Specialist Games Catalogue, or you can ask the staff in your local Games Workshop store to order them for you.

Last, but very far from least, you can find the rules for many of the games in the Specialist Range on our website as a free (yes, free!) downloadable rulebook, along with a large database of articles and player-aids as well
